Online Safety

Ofsted significantly changed how they consider and inspect Online Safety in all early years, education and skills settings, including schools from September 2015.

- The term e-Safety has been replaced with '**Online Safety**'. This fundamental change reflects a widening range of issues associated with technology and a user's access to content, contact with others and behavioural issues.
- Online Safety references are no longer simply statements that are inserted, but occupy significant areas of the new 'Inspecting safeguarding in Early Years, education and skills settings' guidance.
- Ofsted highlights that 'online safety' specifically is one of the broader aspects of care and education as "safeguarding is not just about protecting children, learners and vulnerable adults from deliberate harm, neglect and failure to act". This represents that online safety has an increasing priority for inspectors and very clearly an element of safeguarding. This is exactly where it should be; "for too long, schools (in particular) have considered e-safety to be an ICT issue."

Here at Cornwall Healthy Schools, we have researched some useful resources for schools to share with their staff, learners and parents:

Organisation	What they do	Contact details	Who for?
NSPCC	"Helpful advice and tools you can use to help keep your child safe whenever and wherever they go online."	www.nspcc.org.uk/preventing-abuse/keeping-children-safe/online-safety	<ul style="list-style-type: none">• Parents• Children• Teachers
